SUMMARY

Passionate Full Stack Developer with strong problem-solving skills and hands-on experience in designing scalable web applications using the MERN stack. Skilled in JavaScript, React, Node.js, Express.js, MongoDB, and SQL. Enthusiastic about building clean backend architectures and continuously improving software quality.

SKILLS

C++

Java

JavaScript

HTML

CSS

React

Node.js

Express

MongoDB

MySQL

Git

Docker

AWS

EXPERIENCE

Software Engineer

Company: Google

Title: Software Engineer

Worked on backend APIs, database optimization, authentication systems, RESTful services, and cloud deployment. Improved application performance and collaborated with cross-functional teams to deliver scalable software solutions.

EDUCATION

Bachelor of Technology in Computer Science

GL Bajaj Institute of Technology and Management

2022 - 2026

PROJECTS

AI Interview Coach

Developed a MERN-based AI Interview Coach that records interview sessions, analyzes candidate responses, generates transcripts, evaluates communication skills, and provides AI-powered feedback with confidence analysis.

Canonical Candidate Profile Engine

Designed a data transformation engine capable of parsing recruiter CSV files and resume PDFs, normalizing candidate information, merging duplicate profiles, tracking provenance, calculating confidence scores, and generating configurable output schemas.

CERTIFICATIONS

Google Cloud Arcade

MongoDB Basics

Git & GitHub
